

## Environmental Policy Statement

The policy of Mantank Environmental Services Limited has been and will continue to be the prevention of pollution, and a commitment to continual improvement in Environmental Management.

The Company is committed to its objectives and targets which are established and revised to ensure requirements and expectations are met and will, through the application of this policy, maintain an environmental management system on the lines of ISO 14001 with a view to achieving accreditation.

Mantank Environmental Services Limited is committed to minimising the impact of its operations on the environment by means of a programme of continuous improvements.

In particular Mantank Environmental Services Limited will:

- Meet or exceed, all relevant legislation, regulations, and other requirements
- Continue to develop operational procedures, and review environmental objectives and targets reducing waste through recycling or reuse, and ensuring the safe disposal of other materials and substances
- Continually review the Company's environmental performance to minimise energy consumption and the use of raw materials harmful to the environment
- Make information on environmental performance available to all Company employees, Customers, the public and stakeholders
- Provide the necessary training and support to employees at all levels
- This policy will be reviewed periodically to ensure continued compliance and reflect changes in stakeholder

The Company have appointed the QHS&E Manager as the management representative to keep abreast of all current legislation, and ensure that our management systems are fulfilling the duties of such provisions.
